Israel Adewuyi

+2349033367033 | isistickz@gmail.com | github.com/israel-adewuyi

Education

Innopolis University — Innopolis, Russia
B.S Computer Science — *Aug. 2022 – Aug. 2026*

Projects

Astracode | *RL, Distributed training, verl, sglang, vllm*

- Trained a 1.5B model across 4 A100 GPUs to solve competitive programming problems with RL
- Implemented the project end-to-end, including data gathering step and inference step
- Used verl for distributed training
- Ran multiple training jobs to inform key decisions and leveraged ideas from the RL literature
- Implemented a variant of consensus@n for inference
- Report, HF link (Astracode-1.5B), HF link (Astra_datav1), Github repo (RL training)

Reinforcement Learning Meets NER | *RL, NER, TRL, vllm*

- Trained a 1.5B model to solve NER task via RL
- Took advantage of reformulating sequence labelling task as a generation task
- Achieved slight performance gains
- Blog post, Github repo

Publications

YABLoCo: Yet Another Benchmark for Long Context Code Generation
Aidar Valeev, Roman Garaev, ***Israel Adewuyi****, Vladimir Ivanov , Vadim Lomshakov, Irina Pionkovskaya*

- LLM4Code workshop, under the ICSE 2025 conference

Paper Replications / ML Implementations

Test Time Scaling

- Star: Self-Taught Reasoners — Github implementation
- Tree of Thought: Deliberate Problem Solving with Large Language Models — Github implementattion
- Self-Evaluation Guided Beam Search for Reasoning — Github implementation

Reinforcement Learning

- Fundamental ideas: Generalized Policy Iteration on Gridworld, Multi-armed bandit
- Simple policy gradient
- Proximal Policy Optimization

Mechanistic Interpretability

- Refusal is mediated by a single direction — Github implementation
- Training SAEs (with SAELens) and Crosscoders — HF link

Misc

- From Local to Global - A Graph RAG Approach to Query-Focused Summarization — Github implementation
- Using Genetic Algorithms for HyperParameter search
